Does this include a product to sell?

No, it does not. That is something I felt should be taken on by the actual seller. Everyone has their own "twist" or "take" on certain markets and I would hate to hinder that by clouding your judgment by introducing a widget (think of this as a general item) and perhaps influencing your entrepreneurial spirit.

I would say take this very general and basic method and expand it. Make it your own. Good luck

Thank you for the kind words. Yes and it's scalable so how much you make depends on how far down the rabbit hole you want to go.
