Thread: [What happens when a sportsbook event is cancelled?](#)

Fresku - August 6, 2023, 2:26 am

Hey fellow members,

I've been actively placing bets on the Sportsbook page recently and last night some UFC matches got cancelled (not sure why).

What will happen with the bytes I've placed on the bets? Will the system refund my bytes or wait until the match actually gets played?

Your byte will either be refunded by the admin or there should be an automatic reversal, I believe.

Well for sure your cash will be refunded because its 100% logical

Lets say someone will bet 1 milion dolars on one match and it gets canceled ,i dont think he will lose the money just because the event canceled

Then that is the end of your Bytes. MWa ha ha ha ha!

Na I think you'll be reimbursed when the system goes over your bet.

The question is, when will the system handle these bets ?

it's been like 14 hours since the match was supposed to happen, but nothing yet... The other bets on matches that has been played are paid out already.
