Thread: [seeking front&back c# end devs mods admins GFX +More lets work](#)

CordRestore - August 6, 2023, 10:00 am

This is discord bot related

Guess what 90% of the work is already done

It's a discord backup bot

Front end needs work I finished custom login registration pages and also worked on the index user panels needs to be re done

Backend is 100% finished just need extra features added to it so could be a simple task

I already have a solid marketing plan so I worries there

Don't try to come to me with ChatGPT lol need a solid partner

Also need discord set up and bot tested

Slots that are available

Partner 0/1 60/40% rev split if you help with back end then 50/50

Tester 0/1 voluntary

Moderator 0/4 voluntary / chance to earn commissions

Admin 0/1 commission

Graphics designer 0/1 higher commission

PM me your discord no telegram as this will be on discord

Hate people who offer rev split.. Brother if you're not an already established business with reputation, no one is gonna bother going for that "rev split" for project that might not even be profitable
