Thread: [Call from any number, even with your friends number !\[IPHONE\]](#)

N!tzi.00x0 - August 20, 2010, 2:49 pm

This only works for iphone.

And this one works for every country, even europe like :

The netherlands, Germany. etc.

You must have a jailbroken iphone.

You must have Cydia.

Search in cydia.

Spoof Callerid(spoof) and download it, install it!

[img]http://img812.imageshack.us/img812/1351/fotoh.png[/img]

Then enter your callerid for display. (if you call then the victim will see this number)

Then enter the number to call.

You can change your voice, directly not recording.

Woman - Normal - Man.

Then tick the call number and call.

Wait 25 seconds, tring tring.

100 % working.

I try this on school for joke, i call with the number of the teacher to some student/boy.

GOOOD LUCKKKKK

PS : Sorry for bad english.

What it works for usa, it works even for the netherlands each country!

gozilla123 - September 25, 2010, 12:19 pm

people tested this and it works??

Grimskulls - September 25, 2010, 2:42 pm

I'm guessing this will charge you on your bill noticing that it states it calls out to an international or premium rate number just to spoof the call, than call the number you wanted to prank.

Ill.surfer.Ill - September 25, 2010, 8:45 pm

Well I have used it long time ago, for USA you can make free calls but for rest of the countries you need to buy credit. Worthless!!! ain't it ?

Grimskulls - September 26, 2010, 2:19 pm

Nice, but I live in USA so not worthless too me! Theres free websites that offer this service too, just gotta know how to use google!
