Thread: [Vendor Signature Image Increase](#)

Omniscient - August 9, 2023, 12:13 pm

As a new benefit for Vendors, I have allowed their signature image size to be 1mb (500kb everyone else). It is still 650x200px.

For those wishing to apply to Vendor...

<https://hackforums.net/vendorapply.php>

This is current feature list...

Vendor Benefits

1. HF Contract Template Access
2. Market Profile Vendor Page
3. API Access
4. IP Whitelist (through the API access, api usage not required)
5. Post Edit Ability without time restraints
6. +-5 Popularity Granting
7. Vendor Support (this includes manual reviewing of invalid Disputes/Contracts)
8. Access to Vendor forum
9. Can delete granted Popularity
10. Lower fee for Bytes Bumps
11. 25,000 PM space
12. Unlimited thread replies (auto-close at 2500 replies is disabled)
13. A free BTCpay server account (contact Omni for account setup)
14. Access to the OMUP program.
15. Signature image limit increased to 1mb.

Thank you.

DashPHP - August 9, 2023, 12:35 pm

Fantastic change!

I had to revise my sig a few times as it was going over 500kb, but now I can! :D

Sholi - August 9, 2023, 1:34 pm

Thank you Omni this is a great change.

Charlie Sheen - August 9, 2023, 3:28 pm

VERY nice benefit for us vendors!

Thank you!

Spooky - August 9, 2023, 3:43 pm

Great idea, I love to see the benefits grow and entice new users to joining.

Blazin - August 9, 2023, 3:44 pm

Being a vendor is a W. The thread reply's upgrade alone is worth it.

Biggy - August 9, 2023, 4:36 pm

Nice addition. So many features available to Vendors, makes the upgrade more than worth it.

Cooligan - August 10, 2023, 1:04 am

Oh hell yeah, this should actually do me well for my new signature I'm having made for my MM thread. It also makes the list of perks a clean and even 15 instead of 14.

Too cool, great addition [Omniscient](#)

Side note/idea:

What if we added the V3ndor upgrade to the /upgrades.php page under Ub3r, and list the 15 perks on that page? That way members will always know what they're able to get with their upgrade, and can easily check back to see what the perks are. Just an idea, because as of right now I don't think there's any "official" page where you can view all the perks that come with V3ndor like you can with L33t/Ub3r.

I can almost guarantee there's multiple other V3ndor perks that V3ndors aren't aware of such as:

- 4. IP Whitelist
- 7. Vendor Support
- 9. Can delete granted Popularity
- 11. 25,000 PM space
- 12. Unlimited thread replies
- 13. A free BTCpay server account <- *only added because it's a newer perk that V3ndors might not know about
- 14. Access to the OMUP program

Even I wasn't aware that V3ndors had perk #12, I was wondering how threads all of a sudden were able to surpass the auto-close at 2.5k posts. I also don't think I remember perk #11 either, but I could have just forgot.

I think it could definitely be beneficial both in terms of members easily finding the perks as well as encourage more members to upgrade to V3ndor since they'll be reading the perks that come with it on the /upgrades.php page. Especially with the new 1mb signature perk.

Also - just for some feedback:

14. Access to the OMUP program

- I really wish more V3ndors were taking part in this or at least wanting to. I honestly wonder if the number of members is low simply because a lot of V3ndors aren't aware of the perk? It would make sense anyway. Unless you actively check the Site News or HF News sections, there's definitely some major updates that you'll miss out on like the OMUP program for example.

I did like 10+ OMUP upgrades or more when I was selling my high ticket product. Will surely be doing it again when I can get such high ticket product again.

I actually remember you being one of the few because you removed the background from the OMUP header image:

<https://hackforums.net/showthread.php?tid=6229342>

I plan on doing something similar when I finally finish revamping my MM thread design.

Bullup - August 11, 2023, 11:27 am

ow very nice update, thanks omni!

Omniscient - August 11, 2023, 11:48 am

Meh, no that keen on adding it to the Upgrade page. I think eventually I will do it. What I really want is a complete redesign on the Upgrade page.

Feel dumb asking but what's the OMUP perk? Is this an acronym I'm just not familiar with?

Ohhhhhh. Yeah I knew about this. Thanks! Didn't realize OMUP is what it's called.

Cooligan - August 11, 2023, 3:20 pm

(Aug 11, 2023 11:48 AM)Omniscient Wrote: [\[CITE\]](#) Meh, no that keen on adding it to the Upgrade page. I think eventually I will do it. What I really want is a complete redesign on the Upgrade page. A redesign would definitely be nice to see since it's been basically the same for all these years now. Something more modern and sleek maybe.

I also noticed there's a few small errors like capitalization, random periods, and some grammatical errors. Figured I'll point them out now in case it helps:

- Post flood limit set to 5 second -- assuming "second" should be "seconds"
- Can view invisible users in who's online list -- I'm assuming it should be "Who's Online" (capitalized) since all other features are
- Bytes earning bonus of 150% for post replies and new threads. -- random period at the end (only this and the UB3R equivalent have it -- [L33T])
- Bytes earning bonus of 200% for post replies and new threads. -- random period at the end -- [UB3R]
- Thread creation ability in most Market forums -- assuming "Market" should be "Marketplace" since that's how it's worded elsewhere
- Upload Attachments for Earning Bytes -- "Earning" is capitalized
- Can view Contract details of Contracts not yours -- grammar / "that are not yours" or "that aren't yours" might work better
