Yo, what's up guys,

I started my journey here - <https://hackforums.net/showthread.php?tid=6249392&pid=62063684>

I'm not here to sell you an eBook but give it to you for free - I'll continue to edit it where and when it's needed, but the base foundations should be there.

I'm open to questions - My discord is in my sig / the ebook.

Also considering opening a discord for this as well as HMU if you'd be interested.

A Discord channel for discussion would be great. Do you also run articles through AI detection pre-publishing?

I surely do.

Stanley - August 23, 2023, 7:34 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Syndicate - August 27, 2023, 3:10 pm

Thanks for the free eBook! How much would you have to invest to get this started going?

Filipinium - August 29, 2023, 7:56 am

thanks for sharing this knowledge

Charles Bukowski - August 29, 2023, 8:38 pm

I've downloaded the pdf to read later, I used to make blogs like this back in 2010 - 2012. back when you could just blast backlinks and just start ranking. Would be good to get back into it again, SEO income is steady and reliable.

Add me to the discord if you make it!

SynergizerX - August 29, 2023, 10:13 pm

Hey i appreciate you sharing this with us, ive been looking for a while to do something with AI and try to get a source of income online, the hope here for me is to eventually be able to entirely work remotely and actually be to able to enjoy life!

Going to definitely try this, I appreciate you for sharing your method and journey!

Local Celeb - October 2, 2023, 4:32 am

Read the whole thing- It's definitely one way to do this ?

Given experience you can really use any service & even look to automate these things with Python (or whatever language you choose) eliminating the need for much (if any) interaction.

Mind you, free game for anybody looking to get started- Homie made a pretty decent starter guide

I've seen people say that their SEO is being effected because of using AI generated content. Have you noticed this to be a problem for yourself?

I can't think of how googles robots would determine if it was AI generated or not.

No, it does not affect SEO. People saying "AI" has affected their rankings are talking out their asses. I would assume the helpful content updates or multiple updates that google has rolled out have affected their ranking, so to equate bad rankings to AI-generated content is a load of shit.

There is no way for even "AI detectors" to detect AI-generated content properly. Most of them are a load of bullshit. I have written articles by hand before that have been detected as AI and then generated AI content that has passed.

Yeah, I saw that OpenAI came out and stated that they can't detect their own AI generated replies.

I implore these people saying AI has tanked their rankings to research the Google Updates to SERPs and what they rolled out. Just because they've rolled out AI content does not equate to tanking rankings and I assume with the recent updates their shitty websites were going to get rolled anyway. Just my two cents though.

Yeah Ai detectors are COMPLETE crap. I feel really sorry for university students. Innocent people are going to be accused.
