Thread: [Silent Crypto Miner](#)

knidre - August 23, 2023, 2:45 pm

Anyone know of a crypto miner malware that you can put on other people's computer in 1 click to work in the background?

IE send email with a link to download the file and once the file is downloaded it automatically installs the silent miner.

IE send email with a link to download the file and once the file is downloaded it automatically installs the silent miner.

To earn even 5\$ from silent miners, u need houndreds of bots.

Take a look into Stealers, its more profitable at this moment.

IE send email with a link to download the file and once the file is downloaded it automatically installs the silent miner.

Such a thing doesn't exist. Not unless someone downloads your miner to their Startup folder. Or someone is using IE and clicks Run instead of Save.
