Thread: [Best ways to stay anon](#)

Hi.

I'm looking for the best ways to stay anon, both when accepting payments (such as paypal, cashapp etc.) and doing other stuff that might be handy to do when staying anon.

I know about VPN's, proxies etc, but I'd love some recommendations on how to use them in a proper way, which ones you would recommend and how to stay clear of any bad stuff.

Paypal and CashApp are traceable - you won't stay anon using these payment methods.

Bitcoin is probably the best way to take payments - using a bitcoin mixer.

(Please, someone correct me if I'm wrong)
