Thread: [Free Course Reverse Engineering & Malware Analysis In 21 Hours](#)

xDRISSx - August 27, 2023, 8:29 am

What you'll learn

Launch a career in cybersecurity: Gain practical expertise in reverse engineering and malware analysis opening doors to lucrative opportunities in the field.

Unveil the secrets of malware: Discover how to dissect and analyze malicious code to understand its inner workings with Reverse Engineering and Malware Analysis

Master reverse engineering techniques: Acquire essential skills to unravel complex software and uncover hidden vulnerabilities.

Protect against cyber threats: Learn to identify, analyze, and neutralize malware, bolstering your defense against cyber attacks.

Dive into the world of cutting-edge tools: Explore industry-standard software like Ghidra and IDA Pro to dissect malware with precision.

Understanding the concepts of symbols, stripped, and non-stripped binaries.

Analyzing and examining binary executables for comprehensive insights.

Utilizing READELF to view symbolic information in binary files.

Revealing the contents of object files through detailed analysis.

Exploring the theory behind disassembly and disassemblers' functionality.

Gaining in-depth knowledge of how binary files load and execute.

Mastering the use of IDA Pro and IDA Freeware for advanced analysis.

Exploring useful tabs in IDA Pro to enhance reverse engineering.

Streamlining the process of downloading and installing IDA Pro \ IDA Freeware.

Acquiring comprehensive skills in malware analysis with Ghidra.

And more...

Requirements

No prerequisites or requirements ! You'll learn EVERYTHING in this course !

11 mb rar file (passwd_2023_-Setup.rar). Sketchy link sending you to a "google drive" download link but it's not google drive. Dug around and at one point saw what looked like he was logging IPs. Found a gitea.com account with a bunch of text files linking to different tinyurl addresses. Kinda fun digging around in this but don't dare trust it.

plextrax123 - August 27, 2023, 10:06 am

No problem. I tend to be overly paranoid and it may be nothing but it's just too many hops to a google drive and you never actually see the google drive. I ran some of the urls through malware analysis and some showed as being malicious but I'm new at stuff like this. Those may be false positives. I wasn't really after the course. If I wanna study something and it's worth it I'll just pay. Just was curious what OP is up to.

You click the wrong button

JustGuys - December 27, 2023, 6:23 pm

thank you for this been looking for a while

boyke - December 28, 2023, 5:03 am

thankssssssssss trying this

Maxtroysk - September 5, 2024, 10:38 am

Thank you. Downloading the torrent. Looks interesting.

pompiszon - September 18, 2024, 5:34 am

can u send me for free? no bytes ?
