Thread: [Free Udemy \(warez disallowed\) website courses somethimes there are hacking courses too](#)

plextrax123 - August 27, 2023, 10:21 am

I just wanted to show you about those 2 websites that gives you free Udemy (warez disallowed) coupons for Udemy (warez disallowed) courses there are some hacking courses here and there some are pretty good and some not that good but overall those are free courses fell free to look it up if you want

real[.]discount - first website

courson[.]xyz/coupons- secound website

you can have some courses about programming if you want and all sort of things some links work and they updated every couple of hours and insted of paying for courses you can get those courses for free?

by the way I can't really upload links so if the stuff want me to remove it I will remove it

sorry for my bad English
