Are these codes legit? - Yep, they are from in-game passcodes. Issued by Jagex directly and can't be revoked.

Will I get Runescape Premier Membership if I buy a year? - Due to the nature of these codes, that isn't possible sorry.

How many codes can I redeem? - As many as you need.

You're right, but aren't you taking the chance at a RWT ban? Not sure how common those bans are now.

It changes drastically depending on how the gold was obtained or if its coming from an account that trades a lot of players. Its not like it used to be anymore where it was insanely unlikely you get banned, now theres a pretty high chance depending on who you deal with and how regularly you buy.

Ignore the guy above me, hes sales trashing. Buying Gold in bulk to get a \$0.20/\$0.21 rate with crypto doesn't make sense when you only need membership. Plus I already outlined how unbelievably cheap this service is in comparison to just buying membership off Jagex.
