Thread: [Offering 1 SSH server \[Giveaway\]\[2 months\]](#)

cover7 - August 29, 2023, 7:44 pm

Hi everyone I have 1 VPS server from an Icelandic provider (undisclosed) that I do not have a use for at the moment.

I'm going to install which any distro of choice and provide the temporary root credentials, and from that point on server will be

in full control of our giveaway winner unless my assistance is needed. It has 2 more months left approximately, and you'll be able

to move it to your panel and continue paying it if you decide to do so. ?

To enter you just have to quick love this post ?

Provide a short use case description, as in what you're going to use the server for (at least until you change the root pass lol)

Server is in Island, and has the following config:

Code root@serv1:~# inxi -Fxz

You aren't allowed to host anything that will get the police knocking on some poor guys doors, when the 2 months expire

and you're the one who owns it, it's beyond my control what you do with the server. In addition we might be able to transfer the server onto a fresh panel soon so that time sentence can be avoided.

I'll pick a winner in 24h based on the best use case based on my subjective opinion.

GL, GIVEAWAY IS LIVE!
