Thread: [Giving away 1 FULL RAT SETUP \[VPS included\]](#)

cover7 - August 29, 2023, 7:55 pm

Ok, I feeling like giving today, and fixing up my last post to look even remotely good was agonizing, so I'll keep this short and clean.

I'm going to give one free RAT set up service for a RAT of your choice (you'll have to provide the source files unless we agree differently)

And I'll handle evreything else, including providing you with a VPS and a pannel paid for the next 31 days with the RAT fully setup

and ready to help you in fighting what ever fight you wanna use the RAT for, my only term is that you don't use it to harm innocent people who barely make for their living.

To compete in the giveaway you have to give some of that quick love and comment on what RAT you're going to use and why that RAT in particular.

I'll chose a random member that gives me at least remote feel of confidence he isn't going to ring up his school first thing and have it on board their computers.

Keep in mind, I have no intentions of including a crypting service in this giveaway, that's up to you to do.

I'll just setup the RAT with all corresponding infrastructure and pay for it.

Giveaway closes on the 1. September 22:00 CT

GL, GIVEAWAY IS LIVE!

agadingus - September 3, 2023, 11:18 am

lol your giving one away but you took all of my money and still didnt set me up with one...
your a dick

Wym, I saw 100x whre ppl want to setup a certain rat but don't know how, im sorry wasn't aware on top of everything i was providing in the gw I was also expected to go and source hunting for the rat that you want.

piss off
