All-In-One RAT Mentoring

Need someone to guide you into leading a successful and profitable malware campaign? I got you covered. My #1 goal is to get you to make real stable income in crypto with malware.

Below is everything that is included in this service.

Lifetime Mentoring & Support

- 24/7 Support
- No questions are dumb

Professional Malware Setup Guide

- Guide to setup any RAT & Unam Sanctam Silent Miner
- My Personal Unam Silent Miner Configuration
- OpSec Tips

Crypting

Whenever you need it, I will recommend you a crypter depending on your needs and budget.

Spreading Material

- 2 of my own spreading methods
- 2 landing pages for spreading
- Blackhat SEO Guide

Other Tools

- UAC Bypass exploit source code (C++)
- Discord Worm source code (C++)

Private Telegram Group

Upon purchase of my mentoring service, you will be added to a Telegram group with other people who purchased the service. My goal with this group is to create a blackhat discussion space where like-minded people can help each other and collaborate. You can opt out to being added in the group at any time, obviously.

What truly made me recommend them is that they still help after the contract is complete . They proactively reached out to offer additional guidance and assistance.

As I said I will be buying from them again. 10/10

(Apr 6, 2024 02:57 PM)K.worm Wrote: [\[CITE\]](#) I bought the mentoring. Awesome and verified! Was very easy to work with as well as very available. Has answered any and all questions I had and even after paying I'm still getting my questions answered. I'd most definitely feel comfortable doing business again!

Good luck with sales I didn't know people still use D*rkcomet like bacc in the day, also is the price 300\$ or 60\$+ the rat? This isn't really up my alley but I'm sure people will want to know. Again GLWS

I didn't mention Darkcomet anywhere in my post, I'm not sure what you're talking about.

Both services are independant, the setup service is 60\$ + RAT price and my mentoring service is 300\$.

Yeah DcRat is still fairly decent as of today, it's open source and stable enough for most people. I would probably recommend it for anyone starting out and looking for a free RAT.

do you do mentoring for targeting and infecting individuals where we chat?

for example im chatting with someone on Discord or Telegram and would like to infect her/him with a RAT to gain access to her/his device. Do you mentor this scenario as well?

This scenario is not for making profit. Its just for gaining access.

Of course, I'm open to helping with social engineering as well. I'd say I have a fair bit of experience with it too ;)

Need someone to guide you into leading a successful and profitable malware campaign? I got you covered. My #1 goal is to get you to make real stable income in crypto with malware.

Below is everything that is included in this service.

Lifetime Mentoring & Support

I will provide lifetime support and mentoring for everything related to malware, I will recommend you tools for your specific needs and help you with issues or questions you have. My main goal is to help you make actual money with malware. I am also open to voice calling if you prefer this over texting.

Professional Malware Setup Guide

I will provide you with a high quality PDF guide written by me which will guide you through setting up a RAT on an RDP and a silent miner on a VPS. My personal favorite silent miner config is included with the guide. Every single step is clearly explained in the guide and screenshots are included. If you have trouble with a certain part of the guide, I am always available to help.

I give anonymity tips throughout the whole guide to help you stay safe while doing dirty work.

Crypting

Whenever you need it, I will recommend you a crypter depending on your needs and budget.

Spreading Material

I will provide you with my own spreading method which is highly scalable and efficient. In case my method happens to not work for you (which I doubt will happen), I will also provide two game cheat landing pages to target gaming bots with good GPU & CPU. I'll also include a blackhat SEO guide which will help you rank both of the pages and get traffic on autopilot.

UAC Bypass Source Code

I will include a UAC bypass exploit source code you can use to run your malwares on your clients as administrator completely silently.

Discord Worm Source Code

I will give you a Discord Worm source written in C++ which will allow you to maximize the number of installs you get using my spreading method.

Private Telegram Group

Upon purchase of my mentoring service, you will be added to a Telegram group with other people who purchased the service. My goal with this group is to create a blackhat discussion space where like-minded people can help each other and collaborate. You can opt out to being added in the group at any time, obviously.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
