C# Screen Recorder

[img]http://h.imagehost.org/secure/0785/Untitled_8.png[/img]

I saw a few of these done in Visual Basic, but not any done in C#. So here this is.

For the main image loop you need to set the loop speed by changing the amount time the thread will sleep for. If you leave it at 0 it will go as fast as your processor can handle which will slow your whole computer down a lot. I have it currently set to 50 milliseconds which is a decent speed, but if you are doing this method and over a socket then you would want the sleep time to be much higher because the images need to be sent over the socket.

Aeonhack Archivist - August 20, 2010, 5:32 pm

Wow. Thanks for the share. I have been slowly getting used to C# (I can't stand VB anymore, tbh). Thanks for the share.

h3h3y9 - August 20, 2010, 5:46 pm

nice program mate ;)

keep it on with programing !

Aeonhack Archivist - August 20, 2010, 6:06 pm

Now I gotta figure out how to get it to save the recording as images and then use ffmpeg (or whatever it's called) and convert into an AVI file. I have a basic source for that in VB, but I want to try on my own to do it in C#.

PurpleHaze - August 20, 2010, 6:22 pm

Ya this does not create an actual video file, this is just what you would use in a RAT.

DisconnectionModsss - August 20, 2010, 7:23 pm

Nice share but wrong section, this is for vb.net not C#

Eu[p]horia. - August 20, 2010, 7:34 pm

Why would you call it a recorder if it doesn't actual record anything?

SLAPYA - August 20, 2010, 7:38 pm

hey PurpleHaze...i have been trying to learn some of the more advanced aspects of C# for a while and the last 2 sources you have released have really helped me. Im going to be using both of them to learn sockets and now this. I strongly encourage you to keep posting these as im sure many people are loving it.

if u have time, i would like to chat, please pm me and ill give u my msn

This is written in C#. C# is a .Net based language, thus, it belongs here.

Hmm, good question. I guess that is just the way it is.

(Aug 20, 2010 07:23 PM)Exotic™ Wrote: [\[CITE\]](#) Nice share but wrong section, this is for vb.net not C#

This section is for .NET Languages.

(Aug 20, 2010 07:38 PM)SLAPYA Wrote: [\[CITE\]](#) hey PurpleHaze...i have been trying to learn some of the more advanced aspects of C# for a while and the last 2 sources you have released have really helped me. I definitely will.

As I keep on learning or doing something cool and if it is useful I will post the source with a brief explanation.

D3r1v4t1v3 - August 20, 2010, 8:41 pm

Nice source PH, this'll help me learning C# that's the way I learn. So thanks a bunch. :)

I ROFL wheen i saw this OMG Stop Faming idiot xD what a Fail its .Net language

Ps: you are in the wrong section its the .Net languages xD

2Ps: Nice Screen recoder i like your job :P

Uncle Pillow - August 26, 2010, 7:07 pm

really nice, thanks!

+rep :)
