Unfknbelivable eh?

my friend lost 100k all his life savings and i promised i will find to way how to earn from casinos...

AI and 6 mo. later here we are.

Normal day is 300-500 income in 24h casino rampage.

You can earn alot more but i was just testing games and buying bonuses randomly.

Now i know what games to play and what promotions to use in every casino.

You can send out winnings in btc account.

If i sell you system you can got next 250+ casinos info aswell, atm AI working on them and my company has affiliate contract.

If you leak system or resell those accounts will be banned.

We can team up together aswell. i can get thousands of passports and selfies. so your job will be: playing in casinos all day =)

More info in PM

2-3 ways to scam a blackjack table.

stomp around your slot machine and wear a bunch of metal on your wrists and ankles.

take up the the highest best win opportunity in sportsbook.

standby some short win games that don't spit for a while.

start your own :)
