Thread: [how to bypass chrome file blocked warning?](#)

mxtarny - September 23, 2023, 2:44 pm

so those warning from chrome is giving me a headache

whenever i download my crypted file directly in chrome it says this file may be dangerous and not commonly downloaded

how the fuck i bypass that shit??!

DramaKing - September 23, 2023, 4:35 pm

how the ** i bypass that ****??!

The language isn't helping. If you'd just look, there are [threads](#) on Google Safe Browsing. It's going to come up on any malicious or simply unknown application. You can click 'Keep' to bypass it.

use a download app like IDM or something like that

The_eye - October 3, 2023, 7:55 am

just use another browser like opera or sum lol

hermestrismagistus - October 7, 2023, 12:05 pm

I think he's trying to bypass the warning for other people that will be downloading his malware, not necessarily himself.

Put file in zip with password, so when someone tries to download it, it will download without blocking. But make sure your audience knows the password, tell them in download page or put txt

file in zip with name "pass is 12345.txt" or something like that. It's simple but it does the job done.

yeap thats a way.

you can try cleaning that file aswell

curl - October 13, 2023, 1:47 pm

domain fronting, leverage potential extensions that could ignore warnings, or file-less attack.

Eldamjani - October 14, 2023, 5:57 am

let me try thank you so much!!! [warn]

TheDeadPool - November 5, 2023, 9:51 am

Disable Defenders then try again

or copy the direct link of file and use CURL to download via CMD/Powershell/Terminal

(Nov 5, 2023 10:51 AM)TheDeadPool Wrote: [\[CITE\]](#) Disable Defenders then try again or copy the direct link of file and use CURL to download via CMD/Powershell/Terminal Windows Defender has nothing to do with Chrome Safe Browsing.

Hopsin - November 7, 2023, 7:18 am

There are plenty of methods as mentioned above. There is also method with the chrome flags which can be altered

NickyDev - November 21, 2023, 5:19 pm

just use another browser, for example you can bypass with micrasoft edge.

DramaKing - November 22, 2023, 8:00 pm

Instead of Google Safe Browsing, there's Microsoft Defender SmartScreen.

(Oct 12, 2023 05:19 AM)m0hx Wrote: [\[CITE\]](#) there's another way to bypass it but i wont share lol :3 its pretty simple too.

can share please you possible for me?

placebo - December 2, 2023, 8:35 am

Thanks a million, Sky! Your insights on really opened my eyes to new perspectives. Your thoughtful and well-articulated post has been incredibly valuable. Keep sharing your wisdom – it's much appreciated! [warn]

Yodawarrior2 - December 13, 2023, 8:24 am

There are many packers out there that will make it FUD for at least some time, maybe try that
