Thread: [Own Leaked Database](#)

whatever99882 - September 26, 2023, 1:00 am

Hello everyone,

I was wondering if anyone can give me a simple run down or a link where I can find out how to build my own easily traversable Leaked Database.

Quite new to all of this so advice would be most helpful!

If you mean to save filtered databases to make a search engine, you can use Elastic to save the information and with php you can make a panel

There are lot of public databases are available on the internet, You can use the info to download it. I can personally give some links to public databases if anyone want. You need to convo me for it.
