i think if there is skill upgrade system then it will be good for us.

as sometime my earning become 0 after buying tools. in that situation if i lose the mission also then its very sad?

Correct me if I'm wrong, I think it's mostly just RNG based right? It would be cool if you could pay to increase skills and such to a certain point.

Zero - September 26, 2023, 9:54 pm

Skills are irrelevant. Just spam NASA.

what you mean by RNG based? i just mean to say if there is a option for upgrade skill then it will be good. its just my idea

I mean I think the game currently is just % based right? Adding skills shouldn't be a difficult task to do

WebArt - September 27, 2023, 12:11 am

i dont know how its works. but if there is skill upgrade task also then it will be good

Charlie Sheen - October 1, 2023, 11:06 am

Don't do any of the upgrades, just spend all your money on battery packs. I think someday in the future the upgrades will be worth it but right now I think we are all trying for level 50.

WebArt - October 1, 2023, 2:11 pm

hmm i agree on it sir. but when i dont have money and mission also failed that time feels so sad

oRequiem - October 1, 2023, 9:28 pm

I'd recommend just hitting NASA every 5 minutes. That's what I've been doing and it seems to be

the most effective way of leveling.

It's rng, but it's the most effective way of leveling. Trust, I was at 36k EXP around 4-5 months ago.

if i finish that NASA task then how much exp and money i will earn?

and what is the % ratio of winning of that task

It's a 9% win rate I'm pretty sure, it says it when you're about to hack it. And around \$223 and 400 EXP? Hard to remember, I'm basically hitting it all the time without checking if I win. It's just a routine by now and spending all money upgrading my battery skills.

spending lots of money is not possible for me. but i will try my best to do it

You just gotta rinse and repeat. Hack game -> NASA -> Win = Repeat until you upgrade battery -> repeat.

I do the SQL Inject and Spread a bitcoin stealer back and forth all day and then randomly I throw in a Nasa. I think I've only ever gotten NASA not even 10 times.

Trick is NASA all the way. Rest aren't worth it imo.

wow first time i win in NASA task [oRequiem](#)

from now i will keep spam on it

Just gotta keep tapping NASA every 5 minutes.
I'm telling you, it's more efficient.

WebArt - October 2, 2023, 6:46 pm

ya from this time i will keep playing with NASA only

I told ya haha.
Just keep doing that for as long as possible until you get the award if that's the achievement you're going for.

ya now i understand that skill are not important in this game

Charlie Sheen - October 4, 2023, 12:57 am

I have attempted 30 of the 23% SQL inject missions in the last 27 hours and failed every single one.

WebArt - October 4, 2023, 1:00 am

but i try NASA only now, and in 30 try i win 4 time

It's definitely the most efficient way to level up. All I do is spam NASA as well. I've completed it 15+ times so far.
