FAQ

Q: Do I need any prior trading experience to join?

A: No, our mentorship program is suitable for traders of all levels, from beginners to experienced professionals. We tailor our guidance to your individual needs.

Q: What makes your mentorship program different from others?

A: We offer a holistic approach, covering both technical and psychological aspects of trading. Our private community and Pro Firm Guild support set us apart.

Q: Can I switch from the Public to Private Mentorship plan later?

A: Absolutely! You can upgrade your plan at any time to enjoy the benefits of private mentoring.

Q: How long does the mentorship program last?

A: The duration varies, but you can learn at your own pace. Some traders complete the program in a few months, while others take longer.

Q: How do I get started?

A: It's simple! Choose your mentorship plan, Contact us after purchase and you gain instant access to our resources.

"Guild you to prop funding" might wanna correct that lol..

I might be interested, but show me a broker statement or a Myfxbook with at least 1 year worth of results to prove your legitimacy.

Too many fake "gurus" popping up on here & other forums, if you're a profitable trader you'll be able to provide this without a hassle.

Otherwise, GLWS!

Thanks for this.

I understand your point of a lot of fake gurus making fake promises and stuff. Selling the forex lifestyle dream

But i still stand my ground on what i said. if a student is willing to follow my instructions, I can guarantee he will see a massive change in his/her trading.

A lot of gurus are solely focused on technical that's why a lot of traders still can see profitability despite getting the best course they could lay hands on.
Everyone teaching technical forgetting technical is just 20% of trading.

Here in course we focus more importantly on psychology of trading, sentimental, mindset, habit and mechanics. You should agree with me strategy can't make you a profitable trader.

ICT, SMC, Indicator, support and resistant strategy's are everywhere but yet people can't seem to find consistency.

Here we break things down and build you to a constituent and confident trader even if you have Priya trading knowledge.

And about showing you a fxbook data, i see no need for that as that could be very much manipulated incase you haven't heard of marketing accounts.

Thanks once more i appreciate you comment. Help me break things down.

A profitable trader would be able to show results, considering you avoided my request I will pass.

And yes, I agree psychology is the biggest part of it but if what you're doing is making you money you'd be able to prove it's working.

Doesn't matter if it's the psychological part or the technical part, profitability is profitability lol..

Anyways I wish you the best of luck with sales ?

ICT never had to prove fxbook results. My income remains private.

It was a case of try it yourself, if it works you share the news, if it didn't do same.

Love the fact we had to share some points. Thanks for the wishes mate ;).

ICT has been exposed for being a fraud, but I won't keep posting on your thread.

Thanks & Have a good day.

Thanks & Have a good day.

But information circulating proves his strategy gets people to funding.

Thanks once again brother
