Thread: ["EchoShark R.A.T: New RAT base for Sale,Unleash Covert Excellence!"](#)

Nightmare - September 28, 2023, 2:31 am

EchoShark ?:

If you want to become a RAT seller ??? without knowing to code a single line of code ,this is your opportunity!Just buy this source code and you are ready to go,any updates will be made by me,any new features ,just pm me to make a deal!

[Video: <https://vimeo.com/869062925>]

Revolutionize your experience with EchoShark Server UI, an exceptional platform tailored to enhance your covert operations. We prioritize functionality above all else, offering a minimal yet powerful UI custom theme that ensures optimal performance and ease of use. It's time to unlock a whole new level of control and efficiency.

Let's dive into the remarkable features that will redefine the way you operate:

Both are build with Net framework 4.8 Server/Client but we can change that for the Stub if it's needed!

??? Secure Your Success :

With EchoShark Server UI's communication encryption feature, you can establish a fortress of secrecy around your covert exchanges. Safeguard your sensitive data, maintain the confidentiality of your messages, and maintain the upper hand in every operation.

Take advantage of AES and Morse Code encryption within EchoShark Server UI today. Elevate your operational security, protect your information, and ensure your success in the shadows. Trust in the power of encryption to keep your covert operations hidden and enable you to emerge victorious from every challenge.

? Minimal UI Custom Theme:

Experience a clean and streamlined user interface that keeps distractions at bay. With our minimal design, you can focus solely on the mission-critical tasks, without any unnecessary fancy elements interfering with your workflow.

? Event Logs Flow:

Gain vital insights into your operations by accessing the comprehensive event logs flow. Track every execution, from successes to failures, and easily pinpoint any errors that may occur along the way. Stay informed and in control at all times.

? Fast Custom Datagrid:

Our lightning-fast datagrid ensures uninterrupted performance as it displays all connected clients. Say goodbye to crashes and hello to seamless data management. Quickly identify and manage your network of implants with confidence and efficiency.

? Implant Builder:

Craft tailored implants effortlessly using our feature-rich Implant Builder. Take advantage of powerful customization options such as persistence, IP/DNS settings, port selection, and the ability

to use a custom icon. You can even benefit from our AI-generated stub loader to further enhance your operational stealth and finesse.

? Native Implant:

Harness the power of native implants to execute your operations with unrivaled reliability and efficiency. Enjoy seamless integration into the target system, leaving minimal trace and maximizing your chances of success.

? Builder Log Events:

Keep a close eye on potential errors during the implant building process. Our log events feature provides detailed visibility, ensuring that you can address any issues promptly and maintain peak performance throughout your operations.

? Listener Activation:

Control the activation and deactivation of the listener with just a single click. This user-friendly functionality allows you to initiate and terminate connections effortlessly, maximizing your operational flexibility.

? Module Treeview:

Explore a comprehensive range of available modules, DLL's, Python script's, and bin payloads through our intuitive treeview. Gain easy access to the tools and resources you need, streamlining your operation and amplifying your success.

? Extra Bin Generator:

Need to convert a payload from .exe to .bin (shellcode)! Look no further. Our integrated bin generator offers a seamless solution. Transform your payload effortlessly to adapt to your dynamic operational requirements.

Echo Shark UI organized Code Preview:

We offer a Development Service to add more features/updates !

For those that want to buy Echo Shark ? and start selling it we have also added a License System (Keyauth) ready for use with login form, you just need your keyauth info to add on the source of the login form and you are ready for sales! If you want any other License System just pm me!

EchoShark Stub+ ???:

Let's explore the enhanced default features of EchoShark Stub+:

UAC Exploitation:

Harness the power of User Account Control (UAC) exploitation to bypass security measures and gain elevated privileges silently. Seamlessly execute your operations without triggering any alerts, enabling you to penetrate even the most fortified defenses effortlessly.

Auto Startup/Task Persistence:

Forge an unshakable presence within the target system. Our EchoShark Stub+ allows you to establish auto startup or task persistence, ensuring that your operations persist stealthily and maintain their undetectability, even as systems reboot or users log in.

Location Retrieval:

Extend your reach by effortlessly retrieving the precise location of the target user. Leverage this intelligence to precisely target your exploits, making your operations more effective and reducing risk to the bare minimum.

System Information:

Tap into critical insights about the target system's hardware configuration. Armed with details on CPU and GPU specifications, installed RAM, and more, you possess the knowledge needed to orchestrate your operations with surgical precision.

Payload PID:

Exercise granular control over your deployed payloads by retrieving their Process ID (PID). Maintain oversight and fine-tune their execution, ensuring maximum impact and efficiency in your operations.

IP Address Discovery:

Seamlessly identify the external and internal IP addresses of the target system. These details enable you to forge connections flawlessly, creating a secure communication channel for your operations.

Antivirus and Firewall Status:

Stay steps ahead of security measures by identifying the installed antivirus software and the status of the system's firewall. Strategize and adapt your approach to avoid detection effectively, leaving no room for compromise.

Operating System Recognition:

Accurately recognize the target system's operating system. Tailor your exploits and payloads precisely to its specifications, maximizing the probability of success in your operations.

DNS Information:

Unveil the DNS information of the target system effortlessly. Capitalize on potential DNS vulnerabilities, gain deeper insights into the target's network infrastructure, and navigate their digital terrain seamlessly.

Network Scanning:

Before launching any payload, the EchoShark Stub+ conducts a comprehensive system scan to determine if the target is connected to a network. This seamless network scanning ensures that your operations only commence when a network connection is established, maximizing efficiency and minimizing any chance of detection.

Silent and Stealth Mode:

In the absence of a network connection, the EchoShark Stub+ operates silently and stealthily in the background. It remains dormant, undetectable, and ready to activate as soon as a network connection is detected. This strategic approach ensures that your actions remain covert and undetectable until the perfect moment arrives.

Echo Shark Stub Size: 39 KB and it has good scan rate because it's all coded from scratch without copy paste of any known GitHub trash.

Echo Stub+ organized Code Preview:

Stub is using async Task/Socket to ensure better performance! Don't forget that those are only the default features,if you are planning to use our toolkit we offer even more features to be added (with our PAID Service) and we also offer updates and support for our customers!

Scan Result Oct 16, 2023 06:48 AM :

Price: 489.00 USD

This package is the whole source of the Rat, EchoShark Server,Builder,Login,Bin Generator,EchoShark Stub!This package does not include the support for it and the extra features,if you want extra features just send me a PM to make a deal!
Accepting only Cryptocurrencies ,any Cryptocurrency!

Loot™ - September 30, 2023, 9:23 am

Looks like a great tool! Python is one of my favs!

Nightmare - September 30, 2023, 12:14 pm

(Sep 30, 2023 06:15 AM)Dyne Wrote: [\[CITE\]](#) Hello,

This looks strikingly similar to Cobalt Strike.

Good for you, and I wish you good luck with sales.

Consider vouch copies for respected members of the community to softlaunch your sales.

Have you considered not selling the SRC, and selling individual licenses instead? Most users, unfortunately, get intimidated even compiling a .sh file. It might be worth your while.

(Sep 30, 2023 09:23 AM)Loot™ Wrote: [\[CITE\]](#) Looks like a great tool! Python is one of my favs!

I really love the way respected members welcome me in this forum and showing me the right way to do it...yes my inspiration was cobalt strike and i will do the UI in a similar way like cobalt strike but in mixed lang.. for modules,dll plugins and python scripts.Got many new ideas to start with ,thank you Dyne for your advise(i will keep this thread open for 2 sales to trusted members), Thank you Loot!!

Szymonn1 - October 3, 2023, 11:13 am

Looks very solid.

GLWS

Animazing - October 3, 2023, 11:35 am

basic look and easy to understand like all tools should be
great work OP

BabaYanga - October 11, 2023, 2:01 am

That's looks really good and i love the simple design!GLWS!

Slumerican ? - October 22, 2023, 1:19 am

Interested in the future of this project, let's see how it goes. Good luck.

Kayfoxx - October 23, 2023, 2:24 am

I can confidently say this is a fairly good RAT, and at least is very refreshing to all the copy and paste dreck we have on the market. While I do not have the means or time to do a full stress test I can at least compliment the functions it does support, the screen-view was very nice, download and execute working perfectly and elsewhere most all features function as expected. I also would like to note that when I had an issue BlackHawk was very quick to fix it and get back to me, really solid work all around. Hoping all the best for this gem.

Nightmare - October 28, 2023, 1:30 am

Keeping this thread open for one more sale,i am lowering the price from 489.00 USD to 289 USD and after that i am closing this thread to keep this rat scan rates and private!

Nightmare - November 5, 2023, 10:45 pm

Offer ended,Price is back to the original Price: 489.00 USD!
