Thread: [Nood q,installing rat on android](#)

vijayshetty - September 29, 2023, 1:44 am

I am nocoder

I just have one target and want to track his location,call history and whatsapp chats
I can make him install app,but from playstore only

first time doing this so dont want him to detect virus and make him paranoid
he has low end mobile,poco brand

Google will reject malware submitted to the Play Store unless you're very good at hiding it. Installing from unknown sources is blocked.

How would you "make him" install malware?

I know his likes and hobbies
in short social engineering
