Thread: [Magic Numbers: The Ultimate OTP Verification Tool , Get Unlimited Numbers](#)

**KiNg MajEsty** - October 5, 2023, 7:34 pm

Hello fellow HackForums members,

As I've been browsing the buyer's section threads, I noticed a recurring need for efficient verification services and numbers. Seeing these requests, I decided to put my coding skills to work and develop a unique tool to address these demands. Today, I am excited to present you with Magic Numbers.

Magic Numbers is a tool provides you with unlimited numbers for receiving codes and verifying OTPs. Its standout feature is its flexibility. With no fixed price, Magic Numbers provides an array of options, prices, and countries, allowing you to personalize according to your specific needs.

We've ensured that Magic Numbers comes at the lowest possible fees, making it a pocket-friendly option for all your OTP verification tasks.

Here's a quick rundown:

Run Magic Numbers when asked for OTP verification, e.g., during Instagram registration.

The tool shows your balance and a list of websites. Select "Instagram".

Choose from a list of countries with prices. Specific numbers are not displayed for your privacy.

Use the provided random number for Instagram's OTP verification.

The received code appears in the tool. You're only charged when the code is received successfully.

No charge if the number doesn't work or if you cancel.

Prices :

Magic Numbers is free. Minimum deposit is \$10.

Current Offer: Deposit \$100, receive \$120 in credit.

currently we support :

- 1 - Instagram
- 2 - ChatGPT
- 3 - Twitter
- 4 - Snapchat
- 5 - TikTok
- 6 - Discord
- 7 - Telegram
- 8 - WhatsApp
- 9 - Google / Gmail
- 10 - Steam
- 11 - Credit Karma

want specific website to be added ? let us know

As of the date of this post, sample prices for services are as follows:

Instagram: Starting from \$0.12

Twitter: Starting from \$0.06 and \$0.12

Please note that these prices are subject to change.

"Important Note: About the Python Executable File and Possible False Alerts" ([Click to View](#)) Please note that Magic Numbers is a Python executable file. It's not uncommon for such files to trigger false alerts when scanned with certain antivirus software. This is a known issue within the coding community and while it's generally related to the way Python executables are interpreted, we are actively seeking solutions to mitigate these false alerts. If you encounter such an alert, rest assured that it's likely a false positive. Your trust and security are our top priority, and we are committed to providing a safe and reliable tool. In the interest of your comfort and peace of mind, if you find yourself feeling uneasy about these alerts, we recommend running this tool in a Virtual Machine (VM) or a sandboxed environment. This method will allow you to safely use the tool while keeping your main system isolated from any potential risks. If you're a coder with experience dealing with this particular issue related to Python executables, we would greatly appreciate your input and assistance in resolving this matter. Please feel free to contact me directly.

yes the payment method is crypto , prefer LTC

**KiNg MajEsty** - October 27, 2023, 2:58 am

tool still available and for sale

**Biswajeet** - November 5, 2023, 12:07 am

Is it possible to get test credits

**KiNg MajEsty** - November 9, 2023, 4:16 am

(Nov 5, 2023 12:07 AM)Biswajeet Wrote: [\[CITE\]](#) Is it possible to get test credits  
testing the tool will be manually by my side , since creating the exe file if taking time  
so yes you can test this tool by contacting me  
note , testing is available for now only , to proof this is working

I'm quite interested in giving this a test for a verification if you were giving out testing/vouch copies.  
Looking to leave an honest review as well.
