Thread: [Bcon.global - \[NO KYC\] Crypto Gateway \(Payment solution for Ecommerce \)](#)

BconGlobal - October 9, 2023, 4:22 am

Payment gateway for Ecommerce.

Do you have your own shop, sell goods or services? Receive payment in cryptocurrency without intermediaries! We differentiate ourselves from other processors by developing infrastructure and providing an interface for decentralized payments. Unlike competitors, we do not receive your funds to our accounts/wallets. You receive funds directly from the customer (P2P).

How it works

1. You indicate your wallet address and connect your project to our service.
2. Your customer goes to the payment form and transfers money to YOUR wallet (This could be Electrum, Exodus, Metamask, etc.).
3. Our service tracks the payment and notifies you of success.

What is unique?

We do not have access to your wallet.

All funds are under your control.

We do not have KYC or verifications.

There is no need to wait for the withdrawal of money, as with other payment services.

Flexible API for creating your own solution.

Ready-made plugins for Ecommerce.

Commission - 1% of the amount of each transaction. (Individual % for large projects)

How to pay commission?

Top up your account balance on our service.

The commission is debited from the balance of our service automatically.

More details again:

When customer purchasing on your website, the money goes directly to your wallet that you connected. Those. Your wallet will be indicated in the user's invoice.

This could be Electrum, Exodus, Metamask, etc. . As a service, we do not have access and cannot limit or block your payments in any way. We only provide the opportunity to use our software.

Cost of services: 1% of the amount of each transaction, which you pay separately, replenishing the balance of your account (also with cryptocurrency).

1. Non-custodial (We do not store keys, and you receive money to your wallet that you connect)
2. To register, you only need to provide an email and password.
3. No KYC
4. Connect to the site in a few minutes
5. You can connect any wallet

6. Works with BTC and BNB (BEP-20)
7. 1% commission on each transaction
8. Affiliate program with 20% royalties.
9. There are plugins for OpenCart and Wordpress
10. 5 test transactions to understand how the service works.
11. Wide functionality of Dashboard (See review in our blog)
12. Flexible API

Connecting a website in a few clicks:

Courses and analytics of your receipts:

Payment history, flexible settings, filters, ability to upload statistics:

Hi, does it matter ? I'm support of this service.

This is not Exchange, thats non-custodial payment gateway, that allow you to receive crypto on your site/shop as payment, directly to your wallet.

BconGlobal - March 28, 2024, 11:21 am

Advantages of our service:

1. P2P payments. The client is provided with the address of your wallet (Metamask, Blockchain.com, Electrum, Exodus, etc.).
2. No redirection to our host. The entire payment process takes place on your website.
3. We cannot block your funds as we do not have access to them.
4. No KYC and verifications required.
5. 1% commission, which you pay separately when topping up your profile balance.
6. Ready-made plugins for Opencart & Wordpress.
7. Flexible API.

You don't need to:

- Provide access keys to your wallets. Simply specify the "receiving address" and receive funds to the designated account.
- Wait for holds, fund withdrawals, and various verifications. Money comes directly from the client to your personal wallet.
- Undergo KYC and other verifications to prove your identity.

Our drawbacks:

- BTC & BNB blockchains. Currently, we only work with these currencies. However, we will be adding new blockchains and stablecoins.
- No automatic conversion to stablecoins. Since we do not have access to your wallets.

Cryptocurrencies offer the possibility to eliminate intermediaries in transactions. Traditional payment gateways are no different from banks except for accepting cryptocurrency. We provide an API for blockchain usage as intended. Manage your finances without intermediaries!

woodmartuk - *January 8, 2025, 11:28 am*

Sounds interesting. Is there an update in the future that customers can pay by card and you receive crypto?

Thank you!
