Well, not sure if it's good but I never actually bothered to use VPN. It just always seemed tedious to me and I didn't like how it decreased my internet speed haha

Yup my thoughts exactly. I don't really get up to any nefarious activities on the net so VPN is just not warranted.

I was about to say that as well. No need for VPN if I'm not doing anything that requires it. Hell, I

don't even download shit from Torrent anymore cause buying is just way more convenient for me
haha

??? same here!

My internet life is so basic these days. Programming, YouTube, music, Googling and that's pretty much it.

Using a VPN would just make me feel like a skid in this case. Haha

Man I can't imagine having to hide behind VPS and/or VPN every time I need to use the internet, not worth it lol

Yeah it's a fkin myth having to load all of that to access the net at 300kbs. Terrible. ??

Btw do you advertise your project outside hf or stricly here?

Currently it's primarily here. I am on other forums but no way near as active as I am on HF.

I will start expanding my reach soon though, as I am about to launch my latest project and most of the critical coding is done, I can now focus on mass userbase.

Always lookin out for people lookin to get involved spreading the name!

It's definitely worth it when you don't want to reveal your IP, have targeted data specifically about you, and / or would like to access region locked content ?

Quite a few I some how managed to get a few VPN providers that you normally have to pay for, for

free.

Oh trust me I feel your pain. Not with the page errors necessarily, but with the HG grinding..it took me literally over a year to get to finally reach level 50 and it's the same for most other members I know with the Medal of Honor award; took them all over a year too.

Game needs to get easier. Too much grinding right now. Like 2000 actions per level.

Crazy engagement for a badge though ?

Nah I disagree, I think it's great how it is now. It's a very hard to earn award which is exactly what makes people chase after it and also what makes it so prestigious of an earnable award.

Yeah I can only imagine how many times both the SHJ manual job page and the Terminal for SHJ's have been loaded lol.

Alpha Geek - October 11, 2023, 6:10 am

Yeah I don't bother with it. As previously stated, I'm not doing anything sketchy to where I feel the need to use a VPN.

Omniscient - October 11, 2023, 9:08 am

Do you really get a lot of CF messages using a VPN? When I have used them to browse HF it's not too bad.

Look into Privacy Pass. HF has it enabled.

Private Internet Access VPN is the best I use it every time.
