Time to pimp out your profile, are you going after any awards?

I didn't know you could buy permanent Ub3r upgrade.

The only option I had was one year subscription.

I am trying to get a few awards:

1) I am participating in the Octoberbest 2023, currently got to 36%, It is really hard to make the 600 posts, though

= If I can get the Lounge Head award (currently at 29%), that would be amazing

2) Collecting hearts for the Quick Love award, got to 44% in about one month

3) Doing the Everyday Ninja - checking in every morning for 31 days now, just 69 more days to go

4) I Will go for the Green Apple award, hopefully getting that Q1/Q2 next year.

I heard from one of HF staff, that permanent ub3r may come as an option on black Friday.

I still have to fulfill the time criteria, so I hope it happens after that.

wow, I am pretty sure the thrill of being an Ub3r would have been much more than today's. Now, I believe everyone can become ub3r without prior approval.

I would want to hear it from you, what did it feel like, being an ub3r after approval?

40\$ per year is a small amount you pay for what you get. The community gives you much more. Yesterday, I won a \$25 contest.

More importantly, the value of what you learn outreaches the subscription you pay for.

I don't feel bad I missed this opportunity for a lifetime ub3r.

Contributions are required to keep HF alive. I will pay for the yearly subscription if I have to.

Nice man! You're well on your way to getting some good looking awards.

I think you can make the Octoberfest award.

That's cute.

I will upgrade myself as soon the requirements are met.

HF is definitely a very engaging forum and I like to share my ideas here and learn from other members.

I remember the feeling of upgrading to uber back in 2014 felt like my clout level went through the roof.

Correct. I made sure to wait until I was a little more established to apply to be Ub3r.
Then I bought 3P1C and made R3KT. Now I am a nobody, lol.

Congrats on the upgrade, OP. Enjoy the additional features it brings.

I believe it came with extra inbox space, which I liked, but it was mostly just to add additional incentive to the short-lived Omnicoin v2.

It must have been quite an experience since you can remember something almost a decade ago.

Do you remember the cost of upgrading to Ub3r in 2014, or were there any requirements to complete?
