I think it would be a nice addition to be able to see how long HUM have been alive. It's been kind of annoying trying to hatch my eggs and attacking but it only says that I have to way 24H from enemies being hatched.

No support. People are camping enough already. This will give them yet another reason to camp or even use scripts or timers. Imagine your HUM going out of protection and dying 1 second later. My newly hatched HUM already die within 5-10 minutes of going out of protection.

If I had the choice, I would have auctioned off my eggs for bytes through lotto or used them on the Hack Game.

Now, I'm battling between groups of people teaming up in a battle where I will lose no matter what because I'm a solo player.

For example, I remember you having one HUM at 87 HP for over 6 hours, which I managed to kill.

I wouldn't be alive for over 15 minutes at that low HP.
