Thread: [How to make money hacking/using kali Linux? \(For Beginners\)](#)

Killa131313 - October 23, 2023, 8:07 pm

Without talking crap can you please help explain ways I can use kali Linux tools or other hacking/spamming/carding/spoofing etc. techniques to make money? I know its a noob question but I'm tired of seeing obvious ways such as "Become a penetration tester". I am pretty skilled with computers and have tried and used many of the kali Linux tools... please no shit talking lol

How to do it ?

I've looked for tutorials from various sources but to no avail

Most of hacking is using your brain being creative. You say you're pretty skilled with computers, but in what ways. Use the skills you have to find a creative way to make money, Kali is just an OS with pre installed tools. And tbh mainly used for penetration testing. That's probably why ur getting those replies. What computer skills do you have. You could phish, steal accounts and resell them, but you don't need Kali for that. You could fake a giveaway and sell information, there are a plethora of ways to make money but you gotta use your brain and get creative with your execution.

You used the magic words, 'spamming' and 'carding.' I know some tricks on how to get set up with a 6' x 8' living space for free.
