TelegramBot 2 in 1 Tool

Hello guys I'm Exploit, and I've dedicated the past three years of my life to the world of coding. Today, I'm thrilled to introduce you to an exceptional tool that will revolutionize your marketing efforts. Prepare to effortlessly reach your target audience with unprecedented ease. Imagine a tool that empowers you to effortlessly scrape usernames from group channels, and with a simple click, send bulk messages to engage your audience. Say goodbye to the hassle of manual outreach. Unlike the myriad of abandoned Telegram projects and cloned solutions scattered across GitHub, this tool is a unique creation, meticulously crafted by yours truly. I'm committed to keeping it up-to-date with regular updates and improvements.

I value your input. If you have additional features or suggestions in mind, don't hesitate to share them with me. I'm always eager to explore new ideas and enhance this remarkable tool further. Get ready to elevate your marketing game like never before. Welcome to a new era of marketing simplicity and effectiveness. Let's embark on this journey together, and together, we'll redefine marketing success.

TelegramBot Unique Features

User-Friendly Interface: The application comes with a clean and intuitive GUI , making it accessible even for non-technical users.

Multi-Purpose Scraper:

- Bulk Group Scraper: Users can load a file containing multiple Telegram groups and scrape members from all of them.

- Single Group Scraper: Users can also input a single group and scrape members from it. Bulk Messaging:

- Customizable Messaging: Users can craft their own message and send it to multiple Telegram users.

- Load from File: Users can load a list of usernames from a file to send bulk messages.

- Configurable Delay: To avoid hitting rate limits, users can set a delay between sending messages.

- Batch Messaging: Users can define how many users to send messages to at a time, allowing for controlled bursts of messaging.

- Progress Tracking: Integrated progress bar allows users to visually track the scraping process,

ensuring they know how much of the task is completed.

Stop Functionality: Users have the flexibility to stop the scraping or messaging process midway if needed. **Session Management:** The application manages Telegram sessions, ensuring users don't have to log in repeatedly.

Error Handling and Logging: Comprehensive logging ensures that users are informed of any issues during the scraping or messaging process. This includes handling common errors like rate limits or privacy restrictions. **Data Storage:** After scraping, the application automatically saves the usernames, ensuring users don't lose their data.

Two-factor authentication is supported for Telegram accounts with this security feature enabled. Password inputs are obscured to protect user privacy. **Extensibility:** Built with modularity in mind, developers can easily extend the application's features or integrate it with other systems.

Cross-Platform: As it's built using Python, the application can be run on various platforms, including Windows, macOS, and Linux.

TOS: By purchasing or using the Telegram scraper and bulk send application, the user agrees to abide by all the terms and conditions stated in this sales thread

All payments for the application are to be made in cryptocurrency only. Once a transaction is confirmed, it is deemed final. Refunds will not be provided after the purchase has been made, except under exceptional circumstances at the discretion of the seller. The application is designed for legitimate marketing and business purposes only. Any misuse, including but not limited to spamming, harassment, or violation of Telegram's terms of service

Purchasers of the application are entitled to free updates for a period of one year from the date of purchase. Support queries should be directed to the official support channels provided in the sales thread, and response times may vary. While the application provides features to scrape and send messages on Telegram, users are responsible for ensuring they have the right to access and use the data they scrape.

This can be changed at anytime.

Thanks for showing interest. As of now, I haven't licensed my program. When I do, I will send the free trial your way. But for now, it's available for a lifetime. Will be giving discount out to the first buyer.

Kayfoxz - October 24, 2023, 5:44 am

Very interesting stuff, GLWS op

Thanks you.

Get a 20% discount if you're among the first three customers! Reach out to me. All deals will be conducted on the forum.

Are there any reviews of it?

Browserman4 - October 26, 2023, 8:57 pm

Can it work with more than one tg account, multithread? Proxies?

Exploit798 - October 28, 2023, 10:34 am

(Oct 26, 2023 05:21 PM)??CU?I?? ™ Wrote: [\[CITE\]](#) Are there any reviews of it?

I will be providing a review copy to members whom I trust not to disclose the source code.

(Oct 26, 2023 08:57 PM)Browserman4 Wrote: [\[CITE\]](#) Can it work with more than one tg account, multithread? Proxies?

The application is designed to efficiently scrape up to 10 channels simultaneously. For each channel, it can extract up to 10,000 users. While the current version doesn't have built-in proxy support, it can be integrated upon request to enhance functionality and bypass potential rate limits.

Exploit798 - November 2, 2023, 1:49 am

I'm closing the thread. Please inform me if you're interested in buying the source code middleman is welcome.
