Hey,

I DM'd you.

I'm a Flutter developer, with experience with native code as well (certified too).  
Let me know of the details and hopefully we can work something out ?

I need an application for android and ios that can block and filter sms msgs.

For example i input the word "test" then if message contains test words it will block the sms.

**DeepWeb** - October 28, 2023, 4:34 am

still need a developer. pm me

**DeepWeb** - October 29, 2023, 7:49 am

i still need this, pm me

PM me your budget if it works I can get this done for you on Flutter and provide you both iOS and Android versions.

**DeepWeb** - November 1, 2023, 5:13 am

I need either android or ios dev

PM me your budget as this isn't the most difficult thing to do, dependant on where you want the 'blocked' messages to filter to or how you want to action them.
