Vouch Copy hunting event started.

As i can see nobody is interested into this project so am gonna build files for free for some time to get reviews and attention.

So send my your discord web-hook to private message and am gonna build file for you.

To get a Discord webhook URL, you need to follow these steps:

Spoiler [\(Click to View\)](#)

Create or Select a Discord Server: You'll need to have a Discord server where you have the necessary permissions to create webhooks. If you don't already have a server, you can create one.

Create a Text Channel: Choose the text channel in your server where you want the webhook messages to be sent. If you don't have a suitable channel, create one by clicking the plus icon next to your server's name.

Server Settings: Click on the server name to open the server settings. This is usually located in the top left corner.

Webhooks: In the server settings, select "Webhooks" from the left-hand menu. This will show a list of existing webhooks if you have any.

Create Webhook: Click the "Create Webhook" button. You'll be prompted to give your webhook a name and an optional profile picture. Set these according to your preferences.

Copy Webhook URL: After creating the webhook, you will be provided with a Webhook URL. This is the URL you'll use to send messages to the channel via the webhook. Click the "Copy" button to save it to your clipboard.

Now you have your Discord webhook URL

I'll shoot you a convo with some basic questions, not really interested in the use of this product specifically because of the discord use. But I would be fine with testing it

Sir please use a different medium than discord, perhaps telegram if possible. IMHO this will boost your reach.

PMed you about this.

Keep up the good work!

Thats what I mean, you're saying you are trying to boost your reach.

My advise is to make telegram the base and not cost extra because IMHO;

Discord is not good for what you're doing... But it looks like you put a lot of work in,

let me know if you change the base to telegram.?
