Just join pink group guys free bets in there 90% success rate in NBA 3 games so far and we killed NFL hence why dash is inspired with my idea.

My platform supports multiple tipsters. Like I said, you're welcome
To come back at any time.

And I think you should act on it because if this doesn't show my seriousness in the game, idk what will.

You're not serious about it that's why you got kicked. Don't go around saying something is your idea when it wasn't. The entire pink group saw you fail. You're here dick riding Edge cause you couldn't do something.

Your platform = my idea. But regardless the one Edge did is way better anyways.

And nobody gives a fuck about multiple tipsters, the idea only came to fruition cause of my tips idiot. Your dumbass got inspired seeing my winnings and went and got "tipsters" lol

Kid good luck. Don't be going around stealing ppls shit then pretending like it's your own idea.

" the idea only came to fruition cause of my tips idiot."

You did have the tips, and you shared your gains in a public channel, prior to this I had no knowledge of past betting conversations. I just saw your gains for the first time and the idea to sell came to mind.

It's my idea.

Why hasn't ur site come out yet didnt edge say he can get it done way faster than me

lol imaging thinking something that was discussed in pink group for years and years is your idea.

That's why you got kicked you still stupid.

Why do I need a site out in public? Why you jealous of edge cause he can code better than you?

What idea was your site? The sections? The functions? The way it displays ? What it shows ? Or those were all my ideas in voice/discord ?

Did you even know to spell sports betting before you came into pink?

You programmed a shit site based on my all my ideas and concepts and you're here bragging that's your idea. You got kicked cause you couldn't produce the shit site in time and your here bragging like you did something important.

Anyways kid , good luck. It will never be nothing just like AltPump.

Laughing Man - October 29, 2023, 12:19 pm

Putting this out here right now,

I put \$10 into DraftKings. I played all my \$250 in free bets.

I got all the way up to \$85

I bet it all down based on tips, came back to \$80, I lost \$5 and I'm betting reservedly.

I bet again today down to \$40 and I'm already set to make profit on this.

If you follow and if you bet more than what I bet which is no more than \$5-10. You could make some SERIOUS money.

I suggest anyone who's considering buying.. buy! it's worth every penny, if you are willing to play with the free bets just to test it out, do it! I placed a \$5 bet and got \$250 and played with that and made money.

You got nothing to lose just trying it, but if you are an experienced better, I'm seeing a 65-85% correct prediction rate. Which is pretty fucking crazy.

I would have made a shit load more, but I was too late to place some bets that really paid big \$\$\$\$ and it was because I had personal shit going on.

Hahaha bless up my people!

Unfortunately yesterdays bets were not great and since we are fully transparent here's the breakdown.

Tipster went MIA late Sunday through Monday because he was Ill and kinda forced out these bets.

In any case, I'll be entering todays bets as normal!

Good luck!

Ahh damn man, everyday can't be a winner that's for sure.

But I respect the transparency of it at least bro, most sellers won't do that.

Exactly that brother. I already knew from day one a 100% daily win streak is just uncanny lol. Our tipster is phenomenal and it's clear as day he is as passionate as I am in coding.

So these losses don't hinder me one bit. I fully fully trust my tipster! Will also be meeting him in the near future too!

Everyone should take the time to check this out while it's free! So far I've put in \$20 and as of yesterday I was up to \$76 AFTER I've taken out my initial start money (\$20). Things have been going great so far!

Laughing Man - November 9, 2023, 11:54 am

I've been winning, even on my losses I'm still up.

I'm still playing on my initial \$10 investment.

Yesterday I didn't get to bet unfortunately, I was stuck at work the entire day and didn't get a chance to look at the bets and place them :(so I'm still around \$70. About \$50 profit

I saw one dude invested \$10 and is still betting with those same original funds due to his win profits.

As a fellow handicapper & tipster, that's pretty dope to see bro :)

Ay that's still in the green though and that's all that really counts at the end of the day when it comes to betting.

I've tried this service and I admit it wasn't for me. It does require you to be active to post the bets and you need to spend time shopping around to get good odds on the signals. It's not a no-effort money maker. The time I needed to invest was too much for me.

If you put in the time and the effort, you are guaranteed to make a long term profit. Based on the long term odds and win rate, my calculations based on my bets with him is 1.106. Meaning on average, for every \$1 I bet, I should expect to get \$1.106 in return.

Dash is a great guy, highly recommended to check out any of the projects he works on. He puts in the work to create high quality products, he listens to feedback, and implements them when the majority like it even if he thinks it's a bad idea, or unnecessary.

I wish you all the best Dash. You deserve it.
