Thread: [Looking for a Sportsbook/Casino/Slots Source Code](#)

berpees - November 1, 2023, 4:27 am

Hi, as the title implies I'm looking for the following source code:

- Sportsbook
- Casino
- Slots
- Poker (optional)

It can be crypto only.

Thanks!

I have a website completely setup. It doesn't have a sportsbook but it does have a casino, slots, poker, virtual horserace, coinflip, etc. PM me if you want to check it out. I'd be willing to sell it and transfer the rights over.

so it doesn't come with Evolution/ ezugi other casino gaming vendors ? The source code with built in games ? Can you explain friend or what would be the possibility we can have more online vendors in Game.
