Can you please give any hint about the general idea without exposing it?

What's the price?

Will it keep working automatically all the time?

1.) It involves crypto

2.) \$10 (BTC, ETH, LTC, USDT, USDC)

3.) It's semi-autopilot (you need to check on it from time to time)

If anyone bothered to look at your page, it's full of crypto trading. When you did try to sell the "method", it was an affiliated link with some sort of signal channel...

Does this involve sites that pretend to accept term deposits or offer staking with very high rewards i.e. they are HYIPs in disguise?

What's the ROi on a weekly basis?

Does have to do with staking or trading?

Is this available in the USA?

Whatever you can afford, and it is global (work in the UK). 100% guaranteed it'll work (if you follow the steps)

It depends on what you choose. The higher the ROI, then it's more risky.

Nope, not node related.
