Thread: [how to: unlocking chatgpt restrictions](#)

pixrcxr - November 1, 2023, 11:32 pm

hey guys,

i wanna unlock chatgpt's restrictions when something illegal or harmful? gets in the subject. it restricts helping such topics and i wanna unlock/bypass that restriction. there was such an unlocked AI on a discord server. can anybody help me with smth like that?

Check this out: `tinyurl(DOT)com(SLASH)gptdanx`

I had to post it this way to bypass limitations of new users link posting.

i don't know how to do that :/

Try GPT4All it's quite easy and if you're ok with little bit harder way (but IMO gives more possibilities) get one click installers from github oobabooga/text-generation-webui

LLaMA 2 is probably the best option. AI jailbreak get blocked all the time.

Do you have any good models for coding?

thanks for your replies people. harder but i think i don't need it and correct me if i'm wrong please

guys, i'm confused will nous-hermes-llama2-13b.Q4_0.gguf work for uncensored questions and i doubt how large it's dataset is and debate whether if i should've went for llama2. what should i really do for an uncensored huge dataset-ed AI?

Try researching it a bit, and looking around for new ones. There's some websites that update almost daily with new jailbreaks. Try digging around and finding a working one. - If we gave you one, it would likely be patched in a few days, declaring it useless.
