Hey everyone, I've been hard at work on a data platform, and I'm thrilled to share it with you. It's called PriceToRent, and it's designed to make real estate decisions a breeze.

With PriceToRent, you can effortlessly compare home and rental market trends for any location. It calculates a price-to-rent ratio, helping you determine whether it's better to buy or rent in a specific area.

Who's it for? Well, whether you're a potential homebuyer, a real estate mogul, or anyone navigating the real estate market, PriceToRent offers a bird's eye view of market data.

I've invested a lot of time scraping data to put together this early preview of the app. I'd be thrilled if you could check it out and provide your valuable feedback.
