How to prove you did not do unauthorized access?

Below are the questions that I can think of. Any help would be greatly appreciated it.

- 1) What happened and the consequences of the activities?
- 2) Who found the issue and when did it happen?
- 3) How to fix it?

Are you responding to: <https://hackforums.net/showthread.php?tid=6255903>

Kinda feels like you should just respond to that thread.

I would just post a reply in that thread and a staff member will close this one out shortly.
