Saw this article US is looking to expand trades within the South Eastern Asia / Australia region. Building ports and partnerships, 2024 should be an exciting year for world summits. This investment is huge if you ask me.

In order to keep our status as a nation builder and global policing force we must re-establish ourselves as political and economic investors in key regions. We have lost a lot of ground within Africa and China and Russia have made significant investments within the African continent leading to key strategic positions. In order for the United States to continue to counter Chinese regional dominance we must continue to invest in the Indo-Asian region, really we are seeking to cut into the complexity of the trade lines within Asia and undercut Chinese dominance.

Ultimately, a few reasons for this: countering Chinese political influence, reinforcing supply chains, promoting US political ideology, and ensuring a US regional presence.

In the year 2024, Asia is poised to become a focal point for global markets. The United States has encountered a geopolitical setback vis-à-vis China, which has effectively cultivated positive diplomatic ties and achieved successful investments across various Asian nations, notably Indonesia.

For those contemplating investment opportunities in the Indonesian business landscape, I extend an invitation to reach out to me. I currently oversee two companies and have established a network comprising 20 enterprises involved in diverse and lucrative sectors, including retail, food, commodity exports, medical equipment, among others.

Rest assured, all ventures are conducted through official channels, and I extend this opportunity exclusively to individuals demonstrating a genuine commitment to serious business endeavors.
