I want to run my affiliate business on auto-pilot from now. Could split revenue 50/50.

I make around 5% commission on every deposits on a very popular gambling website.

2.5% for you, 2.5% for me. Possibility to hook people easily cause it can be really addictive.

I currently have the highest possible commission available on the website. But I want to let it run on auto-pilot.

It could be an easy job for someone already skilled with ads campaign and other ways of advertising online.

Let me know if you want to know more about it and share me your experience as well.

PM appreciated to talk about it.
