Thread: [Auto-Spin Slots Script](#)

Mac Miller - November 11, 2023, 5:56 am

```
Code function spinIt() {  
    slotMachine.spin();  
}
```

```
function newUpdate() {  
    var update = setInterval(spinIt, 1500);  
  
}
```

```
newUpdate(newUpdate);  
Code var starterBytes = document.getElementById("credits").innerHTML;  
var counter = 1;  
var bytesProfit = 0;  
var safetySwitchAmount = 0; // 0 = Infinite, Anything else is what it will stop at :)  
soundManager.mute();
```

```
const sleep = (milliseconds) => {  
    return new Promise(resolve => setTimeout(resolve, milliseconds))  
}
```

```
function botSpins() {  
    document.getElementById("spinButton").click();  
} Joel Wrote this one which lets you choose how much you can spin and gives you some stats.
```

He also posted this image of Omni allowing these scripts.

Spoiler ([Click to View](#))

Very simple script that you input into your browser console and it Auto Spins the slots for you. Another member made this, but they got closed and their thread was deleted, so I'm reposting it. Omni approved it previously but if it's disallowed now lmk.

DemonAsylum - November 13, 2023, 12:44 am

Lets hope it doesn't take anyone else as many spins as it did for you to get the award ??

AshleyUK - November 13, 2023, 1:58 am

Letting it spin. Will montior this thread incase it gets said to not be allowed now.

EDIT: Lost half my bytes.... :(

I only know a few lads who had more spins then me

pretty sure [Charlie Sheen](#) had like, 37k or something ridiculous before he got it

god bless this script

If you do the 1 byte min you'll continue to get small wins and it'll stretch pretty far

Just post and do ur daily check ins until ur at about 3k

that will carry you, I had about 2.6k and did 5k spins, and only went down 200

31,086 spins =\

I think I had like 5k bytes and was able to get it.

I wrote a script years ago with a safety switch and a bit more too it. Feel free to integrate some stuff from this into your own script. (I know the code is trash but the ideas are good, I wrote this in 2019 xd)

```
Code var starterBytes = document.getElementById("credits").innerHTML;
var counter = 1;
var bytesProfit = 0;
var safetySwitchAmount = 0; // 0 = Infinite, Anything else is what it will stop at :)
soundManager.mute();
```

```
const sleep = (milliseconds) => {
  return new Promise(resolve => setTimeout(resolve, milliseconds))
}
```

```
function botSpins() {
  document.getElementById("spinButton").click();
}
```

```
function safetySwitch() {
  if (parseInt(document.getElementById("credits").innerHTML, 10) == safetySwitchAmount ||
  parseInt(document.getElementById("credits").innerHTML, 10) < safetySwitchAmount) {
    return false;
  } else {
    return true;
  }
}
```

```
function printStats() {
  bytesProfit = document.getElementById("credits").innerHTML - starterBytes;
  console.log("~~~~~");
  console.log("Starting Bytes: " + starterBytes);
  console.log("Current Bytes: " + document.getElementById("credits").innerHTML);
  console.log("Current Profit: " + bytesProfit);
  console.log("You have played " + counter++ + " times.");
  document.title = "Spins: " + counter;
  console.log("Safety Switch Amount: " + safetySwitchAmount);
  console.log("~~~~~");
}
```

```
function doEverything() {
  if (safetySwitch()) {
    botSpins();
    printStats();
  }
}
```

```

}

function runBot() {
  sleep(4000).then(() => {
    if (document.getElementById("credits").innerHTML >= 1) {
      doEverything();
      runBot();
    }
  })
}

```

Also like to confirm that Omni does allow these bots

How many spins does this do exactly? and what's the requirements to get the reward? ?. I got like 8k bytes or so to spin

It'll keep going until you run out of bytes. The post above by Joel has a minimum credit amount you can set it to stop at.

Minimum of one byte and it took me just over 27k to get the award, but it's random

Ahhh okay, it's a randomly given award. I didn't know that at the time.

Here's my stats currently, hopefully I'll get it soon!

Your Slot Stats

24 Hour Spins: 2,089 Spins

24 Hour Winnings: 1,573 Bytes

All-Time Spins: 3,270 Spins

All-Time Winnings: 3,974 Bytes

I think some of the code got cut off when you copied it into your thread. Ngl when I read the code I wrote I feel so ashamed, it's just so awful lmao.

It took me around 6500~ spins to get it. But if you do spin with 1 Byte you should lose less than 1000 Bytes to get it. Making it HF's cheapest buyable award at like \$2.50

Well with his code, I got it in 11k spins, 1 byte per spin and down 2k bytes from when I started. ?

Only cost me \$5.

Not all users are so lucky though.

Thank you for the share. It doesn't seem the 2nd script works. Anyone have edited one. Wanna stop if award is hit or if hit a certain profit.

Thanks for sharing mate

I would just use the first one and check it every 200 spins or something

After pasting it into your browser console, just do 1 byte spins. Between wins and losses it took me 31k spins and I only spent 4k bytes. Others have gotten it much sooner though. I see a lot of people getting it in 5,000 - 20,000 spins. But you could get the award in like a day or two with the script.

I see the award is random, but if script is done for 7hrs or one hour for a week will the chances be the same? And what is difference than just clicking or auto clicker?

A little over 1,000 spins is all for me which based on all of the results I've seen from others, I was one of the lucky ones haha. Didn't use a script, but if I had gotten 5-10k deep, I can certainly see myself having wanted to take that route. I'd be so demoralized and over it by that point LOL. Probably well before even.
