Thread: [Safely activate Windows 11 22H2 Enterprise no TPM](#)

NullPounce - November 16, 2023, 6:49 pm

download Microsoft's official Windows 11 media creation toolkit exe because guess what?
it has command line arguments!

Open PowerShell in the same directory as media creation toolkit "MCT" and run (without quotes)
bellow:

```
"MediaCreationToolW11.exe /Eula Accept /Retail /MediaArch x64 /MediaLangCode en-US  
/MediaEdition Enterprise"
```

now we have our official legit untouched enterprise ISO direct from Microsoft

download this

<https://github.com/massgravel/Microsoft-Activation-Scripts>

in the release section locate MAS_AIO.cmd and run it to activate windows and office then lookup
bloaty noisy bloat-ware removal tool

there easier way with cmd. But i don't know is that safe. just 3 commands.

NullPounce - November 22, 2023, 6:00 pm

MediaCreationToolW11.exe is from the Microsoft windows website itself and the tpm patch bypass

is on github.

you could also:

```
slmgr /ipk "your key here"  
slmgr /skms kms.xspace.in  
Slmgr /ato
```

and theres many kms servers on github you can spin up in a VM but i can't find it right now

How to use trial software forever ?

cam667 - October 27, 2024, 8:09 pm

use kms for active windows
