Thread: [2 Blockchain payments are not yet confirmed from past 2 days](#)

Transporter007 - November 17, 2023, 11:54 am

Hey guys,

2 Blockchain payments are not yet confirmed from past 2 days and no reply on support. Moreover, this confirmation took soo long time that never happened before with me. Max confirmation time was 1 - 6 hours.

Can anyone help me out on that ?

1st Transaction: [Click Here](#)

2nd Transaction: [Click Here](#)

Edit: Someone told me to connect with walletconnect with dapps ? What is that about ?

Regards.

I guess you were sending with a very low fee. Cause some days ago a friend was charged \$10 to send \$14 fr.

Unfortunately, the blockchain appears to be very congested right now. You can follow your transactions [here](#) and [here](#). But unfortunately, both are not replaceable by fee and you can't speed it up. You're just going to have to wait this one out

1: Wrong Section. This belongs in Crypto section

2: Low fee is the reason. You can use mempool.space to keep Track of the ideal fee

Oh? Thank you for the correction, I wasn't aware.

This is the main thing that's kept me hesitant from participating in web3. I dump in \$100, then i see an interesting dapp, and think let me move \$20 to check it out, nope that's gonna incur \$15 fees to get it there, so never mind. Even more if it's on a main chain like etherium.

How to do that ?

Moreover, Blockchain support is shit from past 1 year as they are not replying.

Okay I will check out that tutorial. ?

Edit: Which one you prefer ?

Electrum Wallet or Wasabi Wallet

Moreover, what do you think about [Exodus](#) ?

Here's my guide for Wasabi: <https://hackforums.net/blog/Wasabi-Wallet-Guide>
PMed you about this.
