Thread: [ISO: KYC Level 1 or Level 2 BYBIT Account \(NOT CA, US or UK\)](#)

fearless44 - November 17, 2023, 1:29 pm

Hi,

what's up hackerforum fam! I'm back once again, like the renegade master. I am in search of, a KYC'd BYBIT account! I am particularly looking for an account that is not KYC'd in Canada, UK, US or any other restricted nations.

I am open to whatever, so long as its not those.

I would like to take advantage of their uber-low fees on margin trading, sadly, I am not able to use without KYC.

Anyone got an account or leads on an account to get this sorted?

Thank, as always, keep it real.

Your main squeeze,

Fearless44

Turns out I can't DM you guys without upgrading or making more posts. So, we'll just have to do it out here in the open I suppose.

How much would you be willing to sell me this account? I'd like to buy it from you and take it over to use as my own.

Turns out I can't DM because i'm not qualified or upgraded enough (Ive definitely received DMs or thought ive sent them in the past though...) anyway, as this post says, I am looking to buy.

How much would you be willing to part with it for? L1 is good enough, tbh. But let me know. I can and have received DMs though, so feel free to do so if you're more comfortable with that.

This goes out to everyone on this thread: Will only start a contract and will only use middleman

here. No funny business or 3rd-Party suggestions please.

This is kinda black hat. I suggest you go find some telegram channels, there's a variety that offer services like these.

I honestly don't know where to look, could you point me in the right direction?

I am just trying to get around my countries new stupid regulations and use the platforms ive been used to for years again.
