2024
CONTAINS ALL NEW METHODS.

EXCLUSIVE PAYPAL HIT METHOD BY @DWCHF

How to hit and cashout paypal logs you may ask. I'm here today to explain.

Requirements:

COMPUTER VERSION :

Hittable websites

Brave

CCleaner

BleachBit

USA LTE PROXIES (I recommend spyderproxy.com/?ref=3O8ub1UI&utm_source=DWC)

OPTIONAL : OTP BOT

PHONE VERSION :

Hittable websites

Brave

USA LTE PROXIES (I recommend : spyderproxy.com/?ref=3O8ub1UI&utm_source=DWC)

If on android and have USA LTE PROXIES (spyderproxy.com/?ref=3O8ub1UI&utm_source=DWC), use Proxidroid.

If on iphone and have USA LTE PROXIES (spyderproxy.com/?ref=3O8ub1UI&utm_source=DWC), Try & look for an app on AppStore

OPTIONAL : OTP BOT

STEPS :

1 / Go on brave, connect to proxy or usa lte,

2 / Go on your hittable website and go to checkout, (I personally recommend reship or using a drop).

3 / Then when you're on paypal checkout, type the log slowly, DO NOT COPY PASTE, type it slowly and try to make yourself look like a normal customer.

If hit : Congrats

If not hit / Looking to hit again : Clean history & memory on brave, then use CCleaner & BleachBit to clean ALL data, if you're using USA LTE, put on plane mod, restart phone and disable plane mod, if using a proxy, take a new one.

HOW TO FIND HITTABLE WEBSITES : Look up for niche websites on social networks, instagram, tiktok, most of these websites doesn't have a big security and are hittable, also try to see and get

shopify websites, those are often hittable.
