Thread: [How to use cookies captured by the Trojan rat? HELP!!](#)

akil.tutor - November 19, 2023, 2:42 pm

I'm trying to use cookies that are captured by my trojan, I researched a lot on how to use them but I can't, can someone explain to me how it works? I'm trying to log in to a social network, I already have the cookie but I can't

Voirus - November 19, 2023, 10:24 pm

What is your goal add it to your browser you mean ?

If thats the case its simple just search on google how to change cookies or how to add a cookie on (determined browser)

NickyDev - November 19, 2023, 10:45 pm

search google for "cookie editor" extension if you have already cookies.

DramaKing - November 20, 2023, 6:23 am

Or go into your browser's Developer Tools, go to Storage, and change the cookies there. However, I would be shocked if the large social networks don't store user agents with IP addresses and flag the attempt as suspicious.

P.S. Don't use 'HELP!!' It just makes you sound desperate and whiny.

source - November 23, 2023, 4:24 pm

just use a simple cookie changer browser extension or modify your requests to include the cookies, then choose a residential proxy located close to the origin as well for better luck.

Sardukarr - November 27, 2023, 10:00 am

Use "antidetector browser"

There are many and some have trial offers. They will do all the work for you.

snyk - November 27, 2023, 4:38 pm

Long process, dm me if u need help

mizza9 - November 29, 2023, 10:24 am

what trojan did you use and how did you spread it?

Tegroid - March 26, 2024, 11:12 pm

what trojan you've used to steal cookies?
