GET THE BEST ANDROID BANKING BOTNET IN THE MARKET, THANOS ANDROID BOTNET

Full Video of testing THANOS BOTNET

[Video: <https://vimeo.com/882920037>]

FEATURES :

Panel functionality:

- Filtering/Search
- Privilege control
- Extensive statistics
- Auto-commands
- Phishing
- Smart injections (interaction with the holder in real time)
- Day/ Night theme
- Language selection (English, Chinese, Russian)
- Authorization if you enter the password incorrectly several times through a telegram bot, done to avoid brute force of your account.
- Ability to receive logs from injection into tg bot.
- Notify tg bot if the bot is online again.
- Convenient sorting.

Build functionality:

- Get Call history
- Get Contacts
- Add Contacts
- Location
- Get images
- Open the app
- Send a Whatsapp message
- Make a Call.
- Live Screen Monitor and Control (VNC)
- File Manager
- Forward SMS
- Send SMS
- Sending SMS to user contacts
- USSD
- Call forwarding
- Send push
- Get accounts
- List of installed applications
- SMS list

- Open the injection
- Update the list of injections
- Open the link
- Delete the app
- Reading Gmail
- Get admin rights
- Take a screenshot
- Clear the cache/memory of the application
- Pull out Seed Phrases (8 wallets)
- Turn off Play Protect
- Keylogger
- Hide SMS
- Turn off the sound
- Read push
- Clear push
- Lock the device

Builder functionality:

- Replace bot after installing 10 applications to choose from. After the substitution, the icon will be replaced and the application that was replaced will be launched.
- Hides the icon on some devices. This cannot work equally well everywhere; the Android shell is too different.
- It is possible to add a black overlay at the time of auto-clicking permissions so that the holder does not see it.
- Block of emulators, RU and CIS.
- Display on top of windows – the resolution is available by default, without clicking – we are using a bug in the Xiaomi firmware.
- Blocking 130 antiviruses and battery optimizers
- Multilingual
- Anti-delete
- Accessibility disabling block
- Two SIM cards
- Works on all devices and receives rights automatically, including Honor and Xiaomi and 8-13 Android.

What a poor scam.

The same pictures and videos as in his old domain hack-tools.net

Ahmed, just find a job.

Hello, I think there is some misunderstanding, the domain that you have mentioned doesn't belong to us.

Best Regards.

I would appreciate you have any proof of scam? Have you purchased any product from us in past? The advertisement here is regarding THANOS Android Botnet , I don't quite understand what you mean? Please stop commenting bad in the thread when you don't even know what is being advertised in this thread.

This is actually quite funny to see that you have just registered two accounts to vouch for yourself. You truly believe this is going to help you in any way. Pure definition of stupidity.
