Thread: [Travel App - React Native](#)

UKevin - November 25, 2023, 2:21 pm

Hello guys, I developed an app for travellers to help them plan trips and get inspired. I would like to have some feedbacks from the community, and I'm also open to new feature suggestions.

The app includes:

Handpicked Itineraries

Trip Planner

'Nearby' Feature (To discover attractions, places, and activities tailored to your tastes)

Tech Stack:

React Native, Expo, Zustand, Firebase, Express, Railway etc..

You can download it from the stores (Apple and Google), using the QR code below, or the links below the image.

Also, if you would like to try the "plus" feature just let me know and I'll grant them for you.

Please let me know what you think, it would be much appreciated :)

[Download - Apple App Store](#)

[Download - Google Playstore](#)

(or scan QR code in the above image)

Hey, I haven't downloaded this, but can confirm it shows up in Play Store with no data collection or sharing according to Google, and includes some in-app purchases.

Looks good!! Definitely want to play around with this, it sounds like you've built a solid app here. Any plans to reskin it for other use cases?

Hey,

No plans yet. At the moment I'm working on integrating Flights/Hotel. The final vision would be an app where you book a package (Flight/Hotel/Tailored Itinerary) and additionally, you can use some utilities within the app (trip planner etc)

Looks interesting, any plans on how you'd like to introduce this to users? Posting to download later and test the UI.
