Thread: [ADM Proxies | Auto IP Rotation | 1.2M IP's | Anti-Captcha, auto-solve challenges](#)

littlephish420 - November 29, 2023, 3:44 pm

Attention: Our proxy API automatically solves captcha challenges so no more being stuck while working.

AndroMeta Proxies is your new favorite proxy provider offering residential IP's to bypass bot detection while creating accounts or logging in using e.g Selenium, scraping or staying anonymous. Does not matter. We got you covered.

Network Information

We are currently offering a proxy that auto-rotates with an IP pool of 1.2M IP's in 103 countries, we are growing our network of proxies and you can be sure that we will be able to provide IP's for even more countries soon.

Proxy Quality Insurance:

Proxies are checked by our automated software that is designed to ensure that proxies are clean before being added to the final IP pool while also monitoring the current IP pool to ensure the status of IP's already added to the IP pool is clean so that your requests will not be detected.

Pricing

1 day (trial) / free (only 1 time per account)

1 concurrent request, 100 requests

2 weeks / \$90

5 concurrent requests, 50.000 requests

1 month / \$150

5 concurrent requests, 100.000 requests

Write through convo, private message or telegram to make a deal and increase concurrents if additional concurrent requests are needed. For transparency, price for additional concurrent's is \$1 per concurrent. Also the prices listed are the discounted prices until 1st of January, 2024.

Contact Information

Telegram: @phishlittle

Disallowed Usage

We do not allow our proxies to be used for spamming. This will result in a ban.

Very interesting.
Can't wait to see this working.
The proxy + captcha is very intriguing.

Definitely give it a try!
We really love this service and think you will too.
Our proxies make getting around captcha's a cake walk ?

thank you for your interest! cant wait for you to try our service. if you have any questions feel free to reach out through dm or telegram <https://t.me/Phishlittle>

Euaggelistes - December 2, 2023, 5:03 pm

Highly intriguing. Thanks for sharing.
Saving this for a project.

What services platforms are these proxies typically used for?
I notice the number of requests for 1 concurrent is near 20k a month.

"As mentioned, this is an rotational proxy service so each request is one new proxy. You can still pick country that the proxies should be from but we already provided some of the use-cases in the thread like web scraping, automation and anonymity. We are out-performancing the competitors in these areas, especially since our API actually use GPT to auto-handle captchas like recaptcha and does it smoothly. Sometimes a good residential IP is not enough, you'd still hit a wall but our service drive a truck through the wall for you. We can provide you with a trial if you'd like to test for yourself."

Blancawert - February 8, 2024, 4:17 pm

Does this work ffor socials?

coconot432 - March 5, 2025, 10:10 am

does this still work for 2025?
