Thread: [WAF cloudflare bypass](#)

8R8_ - December 8, 2023, 8:26 am

Hey im new to this stuff but i did sql injection and got blocked
can someone help me bypass this firewall?

attack - (with out a website couse i dont have 50 posts)

/oauth2/authorize?app

Id=16929&l=en%27 +and+0+in+%28selec

t+sleep%2815%29+%29+-+&brand=derv

&date_first_contact=2023-12-07&signup_dev

Ice=desktop&platform=

What makes you think that the parameter is vulnerable to sql injection.

Skorp - December 8, 2023, 2:27 pm

Posting the ending part of the URL doesn't do anything, need to know the response from the server,
etc. PM me or post the address when possible if you still need help.

If you do not use the little quote bubble to reply to someone they do not get notified,

I suggest starting off with a purposely vulnerable server to learn a bit more before real world
attacks. <https://owasp.org/www-project-juice-shop/>
